EDUCATION

BS: Applied Computational Mathematics: AI and Machine Learning April 2028

Brigham Young University Provo, UT

- GPA 4.00
- Academic Scholarship: half tuition four year scholarship
- Organizations: AI in Business Club, AI Association
- Relevant Coursework: Linear Algebra, Fundamentals of Mathematics, Multivariable Calculus, Differential Equations, Statistics, Mathematical programming (Python), Computational Linear Algebra

SKILLS

Programming: Python, SQL, R

Data and ML: Pandas, XGBoost, Numpy

Tools and Technologies: Supabase, PostgreSQL, APIs, LaTeX, Render

AI Tools: Claude AI, Cursor, Codex

Languages: Spanish (Fluent)

EXPERIENCE

Data Engineer April 2026-Present

BYU OIT Provo, UT

- Developed and maintained 100+ ETL data pipelines across 10+ university systems (Finance, Admissions, Canvas, etc.) extracting, transforming, and loading data across said systems to ensure accurate, reliable data delivery.
- Optimized SQL queries and transformation logic within ETL data flows to improve processing efficiency and reduce runtime, streamlining data integration across source and target systems.
- Diagnosed and resolved data quality issues (nulls, duplicates, mismatched keys) across incoming feeds, building validation checks that eliminated downstream data errors.

Data Science Intern January 2026-April 2026

Shownspace Provo, UT

- Collaborated with a team to develop infrastructure supporting real-time sports analytics.
- Built a real-time sports analytics pipeline ingesting 120,000+ plays per hour using Python, Supabase, and Render.
- Integrated sports data APIs to automate collection, processing, and storage of Ultimate Frisbee game data for analytics and modeling.
- Integrated machine learning models to estimate completion probability, field value, and win probability for every throw.
- Automated computation of 10+ advanced metrics per play through a deployed polling worker updating data every 3 seconds.
- Structured a PostgreSQL database with multiple relational tables to support large-scale sports analytics queries.

Youth Camp Director September 2019-August 2023

Self Run Moorpark, CA

- Navigated high-pressure situations and resolved conflicts while balancing the needs and interests of diverse groups of children.
- Handled budgeting, payment collection, expense tracking, and overall financial organization.

PERSONAL PROJECTS

Ma and Pa App

Tech Stack: Typescript, React Native, Expo, Supabase

- Developed a full-stack IOS app that allows local businesses to stand out in a market filled with huge corporations

AI Internship Tracker

Tech Stack: OpenAI API, React, Supabase, Typescript

- Built an internship tracker that easily allows you to track internships applied to, a do to list, and allows AI resume optimization for certain internships.

VOLUNTEER EXPERIENCE

Full-Time Church Representative August 2023-August 2025

The Church of Jesus Christ of Latter-Day Saints Iquitos, Peru

- Achieved fluency in Spanish to communicate and teach native speakers and improved by talking to 20+ new people daily.
- Served local needs of the community through service projects, free english classes, and spiritual support.
- Led and trained groups of 30+ volunteers helping resolve issues, provide motivation, set and achieve group goals, and give constructive feedback.
